Subject: Piney Point Updates
Attachments: UPDATED: Piney Point Update - April 13, 2021 ; Spot Report #9 Piney Point HRK Site 13APR2021 .pdf

I have a couple of updates to share.

- **Modeling:** FDEP and TBEP are utilizing the Tampa Bay Coastal Ocean Model (TBCOM) by the University of South Florida.
- **Data:** Results are arriving from EPA's effluent monitoring on 4/8/21. FDEP's ambient monitoring data posts to their website. We have an Environmental Unit activated and Water Division staff assisting with reviewing the data. EPA data is still considered internal since coordination on how to share the data is ongoing.
- **Sampling:** Split ambient monitoring data collection is due to begin on 4/14/21. Splits will be sent to LSASD.
- **Frequency of updates:** The REOC's last scheduled Spot Rep was from yesterday. Today the REOC returned to level 3 (standard level) and demobilized their IC and PSC. I plan to reduce the frequency of updates to all of you to an as needed basis.

deliberative

Tara Levine Houda

Commander, U.S. Public Health Service
Water Sector Security and Resilience Liaison & Atlanta Unit Dive Officer
